## Superwhite

Special marking is along the film to confirm the authenticity of the material

## UF-marking

Special marking is along the film to confirm the authenticity of the material

## Technical specifications

	Matte	Glossy	Satin	Other manufacturers
Fire hazard class	F5	F5	F5	-
Film density, g/sq.m	225	225	225	200-220
Film transparency	101	-	-	87
Film reflectivity (gloss only)	-	170	-	95
Film thickness (microns)	205	-	170	185-215
Tensile strength, N	21/28	-	-	-

## Certificates

	ROHS	Restriction of Hazardous Substances Directive
	Reach	The directive that regulates the activities of all manufacturers, importers and end users of chemicals in the European Economic Area
	EN	The film is tested according to the famous European Union directive (DIN EN 71 Child Safety Standard)
	A+	The highest rating in accordance with European legislation regarding the emission of volatile organic compounds and indoor air quality

## The Bauf film

is a technologically new product of record strength, which allows you to implement the most daring and non-standard design solutions from complex multi-tiered structures to incredible geometric shapes.

German trademark.  
New brand from market leaders.

Firma Bauf is one of the leading suppliers of PVC films for stretched ceilings with ten years of experience in production and development, as well as rich traditions.

Stretch Ceilings
